

*When I got tired of being
Good*

*I chose to be the
Best.*

THE POWER OF EDUCATION

The POWER of education...
Turning mirrors into windows.
Knowing how to build walls,
but preferring to build bridges.
The torch that tends to keep glowing in the quest,
Only to learn that it's not the brightness that matters,
but the light that spreads to uncharted territories,
Revealing the beauty of the world
Into which God has put so much love and care
For his children to rejoice, frolic and play.

न चोरहार्यं न च राज्यहार्यं न भ्रातृभाज्यं न च भारकारी ।
व्यये कृते वर्धत एव नित्यं विद्या धनं सर्वधनप्रधानम् ॥

**Located in the heart of City
5 minutes drive from Sonipat, close to NH1,
20 Km from Delhi Border,
A nursery that nurtures dreams and has been set up by a dreamer,
A dreamer whose dreams defined the benchmarks in the field of education,
A dreamer who is known for his vision,
for his relentless efforts to materialize his beautiful dreams into reality,
and for his deep rooted spiritual inclinations and unremitting social welfare activities.**

This foundation was the brainchild of the visionary educationist Mr. Rakesh Kuchhal, who was the first to set up a private engineering college in Sonipat to cater to the demand of quality education of this rapidly developing city, who is well known in Sonipat for his spiritual and social contributions to the advancement of the society. The making of the famous Babadham Temple is a testimony to his sincere efforts and the sacrifices he has made for the general good.

Shreejee -
where modern learning is facilitated with world-class infrastructure,
where teaching is seasoned with the language of love,
where compassion and kindness are taught as universally acknowledged human values,
where the visionary keeps a close watch on global trends to adopt and implement them, and
where the original vision of this globally oriented school is creating a niche of its own in the field of education.

A WORLD OF INFINITE POSSIBILITIES

THE 'CAN DO' PLEDGE

I knew I was someone special.

This Dream project was designed for being more than just a school.
It was designed to be a breeding ground for achievers,
a training ground where champions will be taught how to stay champions forever.
It is a project way ahead of its time, an idea so radical that within one year of its inception,
it was declared one of the top cybernated schools of India, ranked
No.1 in SONIPAT*

The idea was simple:

To create a place where intellectual, analytical and physical abilities of a child are nurtured.
To instil in the child the confidence and skill to excel in his/her choice of field.
To develop character that accepts defeat gracefully and victory humbly.
To build an attitude of respect to the almighty and the forces of nature.

To have the serenity to accept what we cannot change,
To have the courage to change the things we can,
And in doing so master the changes rather being mastered by them.

*The air is filled with 'can do' attitude.
I am indeed someone special.*

TELL ME AND I WILL FORGET,
TEACH ME, AND I MAY REMEMBER,
INVOLVE ME AND I WILL LEARN...

Designed by a renowned architectural group, this centrally air conditioned campus is spread over 11 acres, an ideal place for us to expand and fully bloom;

Spacious theme based digital classrooms and futuristic e-learning methodologies stimulate our creativity while allowing us to access the tools to excel further in our field of choice.

I realize I am studying with a lot of exceptional students,
some fancy art, others prefer numbers,
some love experimenting and making new stuff,
some of us find comfort in reading literature,
some enjoy sports,
And we do it all.

The emphasis is never merely on acquiring some information, it is more on understanding it, feeling it, experiencing it and visualizing it. Personality Development Programs and Communication Skill Development Programs enable us to use that information in the real world. Education inspires us to be responsible individuals who will eventually contribute positively to the society in diverse ways.

HABIT OF GOING — THAT — EXTRA MILE...

Our determination is a direct reflection of the fundamental qualities instilled in us at Shreejee.

*The habit of not giving up, just when your body breaks, your mind starts to give up, and all you want is to collapse in a warm bed and go to sleep...
You decide to pull yourself together and give that one last burst of energy, and ensure that you become a champion.*

This is a valuable lesson for life, instantly and intensely felt on sports field while playing volleyball, football, cricket, basketball, tennis and a lot of other games. Life at Shreejee is a truly enriching experience, both inside and outside the classrooms.

I realized I had superpowers. I had just never used them before.

To me impossible is redefined from something than cannot be done to something that has never been done before.

Intellectually stimulating activities conducted by vastly experienced teachers, are designed to enhance memory and analytical abilities and provide us with a strong base for our thought process.

Frequent field trips to study nature and explore the world fill our hearts with gratitude towards the Almighty for bestowing on us so many gifts. The humility nature inspires and the feeling of being blessed that pervades our learning process have taught us to enjoy life while learning.

We meditate to unburden our minds and achieve clarity. Mandatory co-curricular programs enable an all-round development of the mind and the body, and we hone our skills in whatever we want to achieve. The school fosters all talents, like a cloister overlooking a beautiful boulevard, full of a variety of flowers, each magnificent in its own way.

I LEARNED HOW TO THINK,
RATHER THAN LEARNING
WHAT TO THINK..

THE SHREEJEE EDGE...

The best part about learning in this dreamland is that it is never done in the traditional sense. Boring is a word we are not familiar with. All our lessons start with stories that make us think, push us to connect the dots leading to learning. The colourful ambience, themes and teaching aids used in class are so potent that they imprint the lessons firmly onto our minds.

The usual teacher monologue which my friends at other schools complain about is something we have never heard of. To us it is all about a dialogue, a healthy communication that involves even the last bench, and everyone contributes as we discover the mysteries of the universe.

The joy of reaching a conclusion by yourself gives a great sense of achievement.

*We are not taught at Shreejee; instead we discover ourselves here.
Learning by doing, discovering, understanding and appreciating, that's how we do it.*

I WAS TAUGHT HOW TO COUNT, ALONG WITH WHAT COUNTS...

The vibrant learning atmosphere at Shreejee focuses more on why's then on what's. Teachers are constantly counselled to ensure better student development, enabling the learning facilitators to keep pace with the constantly involving global trends and standards.

The regular review system and workshops focus on communication and familiarizing teachers with advanced educational strategies. They are designed to aid the development of teachers into role models who inspire excellence in every class they teach, with every concept they elaborate.

Teachers are highly motivated and dedicated. We feel as if they look at the world through our eyes and teach us to identify the beauty in the ordinary. Their encouraging and motivating words echo in our minds, steering and guiding us through the shoals of problems and dilemmas into a world of promise and delight.

The optimum teacher to student ratio is maintained so that each of us gets the personalized attention we require for us to identify our passion and to achieve essential academic credentials and also desirable results in the field of our focus.

Their smile puts us at ease.

IDEAL STUDENTS TODAY,

RESPONSIBLE CITIZENS TOMORROW...

Our teacher told us to select a random object from somewhere. Some of us picked the pen we had in our hands, others picked their school bag, still others chose their bicycle they loved so much. Then the teacher told us to think about its origin.

To our surprise we realized not one but many individuals had contributed in making that object reach us, from the inventor who invented the technology to the manufacturer who produced it; from the factory workers who toiled in the factories to the carriers who transported it to us.

We realized that the success of our species lay in our ability to work as a team. Even without knowing the other person very well we can align our goals and put efforts with complete dedication towards a common mission and achieve miraculous results.

That was our first step towards becoming a global citizen, and thus was compassion and love for other humans inculcated in us. We celebrated national-international days to appreciate the feeling that has united us as a species.

At Shreejee we learn how to be ideal students, and our transformation into responsible global citizens has begun.

LEARNING SKILLS FOR FUN,
USING THEM IN LONG RUN...

A lot of lessons in life are learnt in the most simplest of ways.
While pulling the string of a bow at THE AIM I realise the value of concentration.
While swimming in the AQUA pool I realise how effortlessly I can manoeuvre like a fish,
While skating in THE RINK I feel as if I can fly,

At DHYAAN I enjoy silence.
At VOICES I master my vocal skills.
The PASSWORD deciphers computers.
The CANVAS is a visual art station for blissful hills.

QUANTUM is where the laws of the universe are showcased.
FUSION is where chemicals interact.
APPLAUSE is where we earn claps.
FIRST SERVE is where we quickly react.

Life at Shreejee is inspiring in a million ways...

MR. RAKESH KUCHHAL

CHAIRMAN'S MESSAGE

Pristine and innocent minds are like blank slates,
Ready to imbibe, absorb and reflect.
Therefore, it is our primary duty
to provide the best of our resources for this noble task.

To educate, enlighten, empower,
To ideate, actuate and execute.

For a brighter future and a better tomorrow.
Giving the right inspiration to impressionable minds from the beginning accelerates the
process that transforms them into curious seekers, dreamers and learners.
Exploring and improving their skills help them become more efficient and confident
individuals.

Education is not about merely developing academic performance.
Co-curricular activities should be designed to impart emotional intelligence as well .
The whole purpose of education is to stimulate creativity of young minds,
and to teach them the value of discipline and make them aware of the benefits of
determination and perseverance.
We are proud that we are taking this noble responsibility in Golden City, Sonipat.

Mrs. SUDHA KUCHHAL
FOUNDER TRUSTEE

Mr. K.N. DAR
VICE CHAIRMAN

Mr. HIMANSHU KUCHHAL
DIRECTOR

THE **PRINCIPAL** SPEAKS

*To me,
Being the captain of this ship,
which is on course for this amazing voyage of learning and inspiring,
is an experience for which I am deeply grateful .*

The principles on which this esteemed institute was built are of prime importance to me as a Principal. Our main focus is to give each and every child at Shreejee the individual attention they require, so that their strengths and weaknesses are identified and supported for their eventual success. The highly inspirational campus of Shreejee is a dream nursery, where future thinkers, achievers and philosophers are nurtured so that they reach their full potential as ideal citizens of the civilized world. We constantly strive for a steadily rising graph by ensuring better standards of education and evolving our methodologies and teaching techniques. We have been blessed by the Almighty with success in all our attempts so far.
